Cundall strengthens security specialism with key appointment

Cundall has announced the expansion of its security specialism with the appointment of Chadik Miah as Principal Security Consultant.

Chadik joins the international multidisciplinary engineering consultancy from BB7. He brings with him a wealth of client-facing experience in areas such as security threat and risk assessments, security strategy and masterplanning, Secured by Design (SBD), counter terrorism and physical security design, blast assessment and design, and Hostile Vehicle Mitigation (HVM).

Chadik explains: “I have developed a great body of experience, working on high profile projects, particularly advising on and designing mitigation measures for physical and counter-terrorism protection. I am looking forward to bringing my knowledge to Cundall and providing added value to their existing client offering.”

He has extensive experience engaging and managing clients, engineers and architects on major multidisciplinary projects including high profile events, hotels, public realm, mixed-use developments, office accommodation, secure facilities and Critical National Infrastructure (CNI).

Continues Chadik: “I have always enjoyed working with people and developing productive working relations with a range of clients and stakeholders. This combination of people and engineering innovation is the best of both worlds for me, and is a key part of my new role at Cundall. “

Darren Wood, Cundall’s security specialism lead: “We have been keen to grow the security specialism and adding such specialist skills as Chadik possesses enables us to deliver a holistic security consultancy offer in house. This provides our clients with the broadest possible range of specialist security expertise, helping to support their business and projects, with the ultimate goal being to ensure that their people, property and assets are protected from the constantly evolving crime and terrorism threats.”

Cundall’s security specialism works internationally across all market sectors with key security projects already delivered in offices and workplaces, critical systems and Critical National Infrastructure (CNI).

Cundall: 40 years of clever, friendly engineering

Cundall is an international multi-disciplinary engineering consultancy with over 800 staff and offices in 11 countries across the globe.

2016 saw Cundall (Cundall Johnston and Partners LLP) celebrate its 40th anniversary. Established in 1976, Cundall's founding partners shared a common vision that the practice would become a leading multi-disciplinary engineering consultancy built on sound ethical principles. For 41 years, Cundall's engineering expertise, coupled with creativity, innovation and a deep-rooted understanding of people and communities, has allowed the business to develop the best possible solutions for clients' projects. We are Clever, Friendly Engineers.

Harkening back to the founders' roots, sustainability is integral to our approach. We provide our clients with practical advice and solutions, which reduce the environmental impact of developments, and provide better spaces for building users and occupiers, as well as for the wider community.

Cundall is the world's first consultancy to be endorsed as a One Planet Company. As a business, Cundall has implemented several sustainable initiatives on projects around the world, as well as in our offices and homes. For example, Cundall's new London office at One Carter Lane is the first building in the UK and Europe to achieve WELL Certification through the WELL Building Standard™ (WELL), a goal intended to put the health and wellbeing of the occupants at the heart of building design.
